🎓 Academic Details

Bachelor of Engineering (B.E.)

Computer Engineering,

Chandigarh University, Gharuan Punjab

CGPA: 7.8

🧠 Technical Skills

Programming Languages

JavaScript (ES6+), TypeScript, Python, Solidity

Frameworks & Libraries

React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS

Backend Technologies

Node.js, Express.js, NestJS, REST APIs, Background Jobs, Event-Driven Systems

Database

MongoDB, MySQL, PostgreSQL, AWS RDS

Messaging & Communication Systems

Redis, RabbitMQ, Apache Kafka, WebSocket, gRPC

Version Control

Git, GitHub, Bitbucket

Cloud Platforms & DevOps

AWS (EC2, S3, RDS, Cognito, Lambda), Google Cloud

System Architecture

Microservices Architecture, System Design, Database Modeling, Scalable System Design

SDLC

Requirements Analysis, Agile/Scrum, API Design, CI/CD, Production Support

Soft Skills

Leadership, Problem-Solving, Adaptability, Critical Thinking, Communication, Pre-Sales and Post-Sales

📄 Profile Summary

- Full Stack **MERN Developer** with **4 years of experience** delivering scalable, production-grade web applications, driving system reliability and long-term business value across frontend and backend.
- Proficient in **React.js, Next.js, Node.js, Express.js, MongoDB, and TypeScript**, enabling faster development cycles and robust end-to-end solution delivery.
- Designed and implemented **REST and GraphQL APIs** with secure authentication and RBAC, resulting in improved data security and controlled access across applications.
- Built and maintained **300+ production-ready features and releases**, ensuring high availability, minimal downtime, and consistent user experience.
- Optimized application performance through **code splitting, caching, database indexing, and API response optimization**, reducing latency and improving scalability under load.
- Applied **microservices-based and modular backend architectures** to support independent scaling, easier maintenance, and faster feature rollout.
- Deployed and managed cloud-native applications on **AWS (EC2, S3, RDS, Lambda)** using **Docker and CI/CD pipelines**, improving deployment reliability and release efficiency.
- Resolved **100+ critical production issues**, significantly improving system stability, fault tolerance, and overall platform performance.
- Demonstrated strong **end-to-end ownership**, problem-solving, and cross-functional collaboration, ensuring timely delivery of high-impact solutions.

🏢 Work Experience

Sr. Full Stack Developer, Eminence Technology

04/2024 – Present | Mohali

- Served as the **core technical owner** for complex, high-impact initiatives, driving projects from concept to production with complete accountability.
- Translated ambiguous business requirements into **clear technical direction**, ensuring predictable delivery and high client confidence.
- Acted as the **primary client-facing technical lead**, handling requirement discussions, solution walkthroughs, feedback loops, and delivery alignment.
- Consistently delivered **mission-critical systems on time**, balancing speed, quality, and long-term scalability.
- Made key architectural and technical decisions that **reduced risk, improved reliability, and increased product credibility**.
- Led and mentored engineers by setting coding standards, reviewing designs, and unblocking execution to maintain high delivery velocity.

Mern Stack Developer, Revca

10/2023 – 04/2024 | Remote

- Led **full-stack development** of a teledentistry platform, including **AI diagnostics, real-time video/chat consultations, appointment scheduling, dental record management, and subscription/payment systems**, ensuring a **scalable, secure, and production-ready solution**.
- Owned backend architecture, API design, database modeling, cloud deployment.

Full Stack Developer, Farmheal

03/2022 – 09/2023 | Jaipur

- Independently built a **full-stack e-commerce warehouse management system**, owning frontend, backend, database, and deployment.
- Automated **real-time inventory tracking** with low-stock alerts and integrated warehouse, order, and payment workflows, reducing processing time.
- Designed **centralized database and REST APIs** for consistency and scalability.
- Developed **role-based dashboards** for efficient cataloging and fulfillment.

📁 Projects

Solar Calculator, A virtual solar calculator for estimating energy production, costs, savings, and ROI prior to solar installation.

PayOnward, An AI-powered payment automation system

TruGamer, A unified gaming platform for managing game libraries, tracking progress, discovering releases, and engaging with the gaming community.
